CHENG DAY MACHINERY WORKS CO., LTD.

SAFETY-IMPORTANT

The use of any hoist and trolley presents some risk of personal injury or property damage.

That risk is greatly increased if proper instructions and warnings are not followed. Before using this hoist, each user should become thoroughly familiar with all warnings, instructions and recommendations herein.

THIS SYMBOL POINTS OUT IMPORTANT SAFETY INSTRUCTIONS WHICH IF NOT FOLLOWED COULD ENDANGER THE PERSONAL SAFETY AND/OR PROPERTY OF YOURSELF AND OTHERS.
READ AND FOLLOW ALL INSTRUCTIONS IN THIS MANUAL AND ANY PROVIDED WITH THE EQUIPMENT BEFORE ATTEMPTING TO OPERATE YOUR ELECTRIC WIRE ROPE HOIST.

1. FOREWORD

This manual contains important information to help you properly install, operate and maintain the electric wire rope hoist for maximum performance, economy and safety.

Please study its contents thoroughly before putting the electric wire rope hoist into operation.

By practicing correct operation, procedures and by carrying out the preventative maintenance recommendations, you will be assured of dependable service. In order to help us to supply correct spare parts quickly, please always specify,

- (1) Hoist model.
- (2) Serial number.
- (3) Part number, plus the description.

We will have your trust of Cheng Day's long term satisfactory service as our belief.

Should you have any queries, please contact:

(Please ask for a company's stamp from your local agent)

2. MAIN SPECIFICATIONS

2.1 Specifications

The following specifications are common to all electric wire rope hoists.

Table 2-1 Specifications

Item	Detail		
Working temperature range (°C)	-5 to +40		
Working humidity range (%)	85 or less		
Protection	Hoist (Normal)	IP 40	
Electric power supply	Three Phase, 220~600V, 50/60 Hz		
Noise Level (dB)	Single speed hoist	81	
	Dual speed hoist	81	
Wire Rope diameter	WLL (working load Limit) (t)	Nominal diameter (mm)	
	TBH(D)-750 SBH (D)-750	7.5T	Ø14 6×37-H
	TBL(D)-1000 TCAH(D)-1000 SBL (D)-1000 SCAH (D)-1000	10T	Ø16 6×37-H
	SCAL (D)-2000	20T	Ø20 IWRC 6×P.Fi(29)-H
	SEAL (D)-1500	15T	Ø20 IWRC 6×Fi(29)-H
	SDAH(D)-1500 SFAH (D)-1500 SFAJ (D)-3000	15,30T	Ø18 IWRC 6×Fi(29)-H

Remarks: (1) Contact an authorized dealer for information on using the hoist over the working temperature or humidity range.

(2) For dimensions and other details, refer to the latest catalogue.

(3) Noise levels were measured at a distance of 1m horizontally from the hoists during normal operation.

2.2 Mechanical Classification (Grade) and Lift

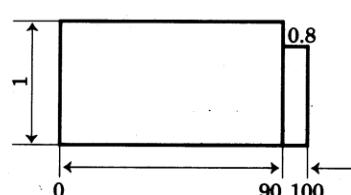

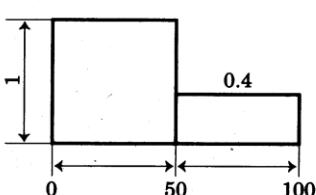

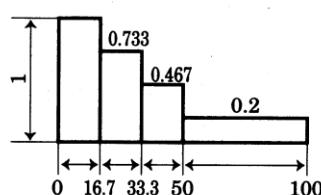

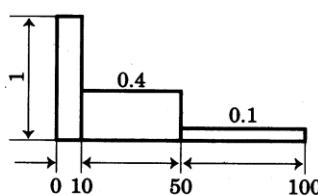

Safety and life for electric wire rope hoists are guaranteed only when the said Equipment is operated in accordance with the prescribed grade.

Electric wire rope hoists have been designed according to FEM 2m regulations (FEM 9.511). Details are provided in Table 2-2.

Average daily operating time and total operating time are determined by load distribution.

Table 2-2 Mechanical classification

Load Spectrum (Load distribution)	Definitions	Cubic mean value	FEM 2m	FEM 2m
			Average daily Operation time(h)	Total operating time (h)
1 (light)	Mechanisms or parts thereof, usually subject to very small loads and in exceptional cases only to maximum loads.	$k \leq 0.50$	4 - 8	12500
2 (medium)	Mechanisms or parts thereof, usually subject to small loads but rather often to maximum loads.	$0.50 < k \leq 0.63$	2 - 4	6300
3 (heavy)	Mechanisms or parts thereof, usually subject to medium loads but frequently to maximum loads.	$0.63 < k \leq 0.80$	1 - 2	3200
4 (very heavy)	Mechanisms or parts thereof, usually subject to maximum or almost maximum loads.	$0.80 < k \leq 1.00$	0.5 - 1	1600

2.3 Safety Devices

(1) Motor brake

"AC Electro-Magnetic Brake" is of a unique design in its field. It features Simultaneous motor braking upon switching off power even under full load condition.

(2) Emergency brake system (B-type hoist available only)

In case of main braking system failure, the lost speed happened, the emergency brake system will automatically stop the transmission mechanism to prevent hooked load from falling down.

(3) Hook and hook latch

The hook is drop-forged from high tensile steel and heat treated for strength and toughness. The bottom hook is capable of 360° swivel and fitted with safety latch to ensure safe lifting.

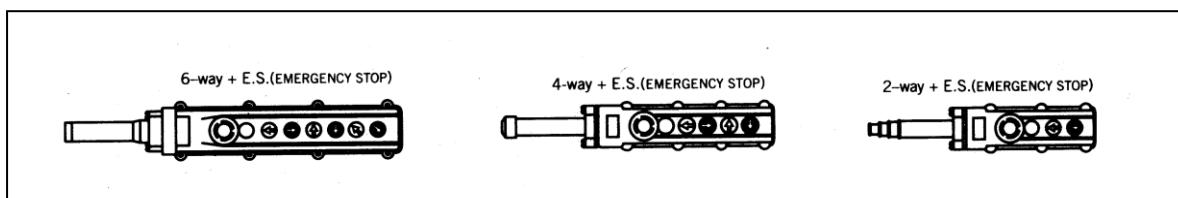

(4) Limit Switches

Upper limit switches are fitted for switching off power automatically in case of Over lifting.

(5) Emergency stop device (optional)

This button is used to stop the hoist in an emergency situation. It is a red, mushroom type button, located at the uppermost position of the pendant. When pressed, power to the equipment is switched off and the button locks automatically.

Turning it to the right will release the lock and enable re-starting. (Illust. 1)

Illust. 1

3. SAFETY RULES

DANGER

The hoist herein is not designed for, and should not be used for, lifting, supporting, or transporting personnel. Any modifications to upgrade, rerate, or otherwise alter the hoist equipment must be authorized by either the original manufacturer or a qualified professional engineer.

(1) Only the trained personnel are allowed to operate the hoist.

(2)

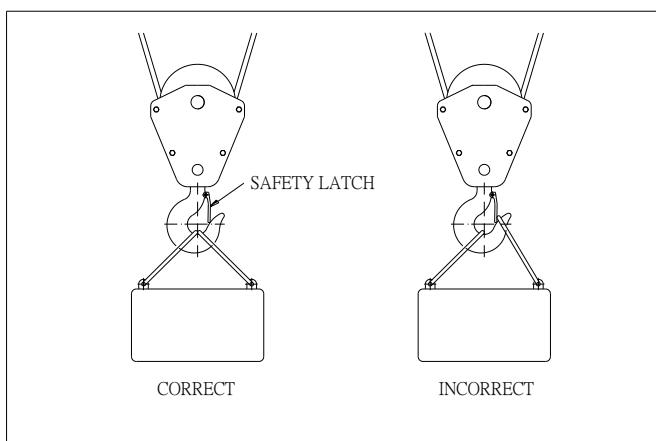

DANGER

Do not use the hoist in explosive atmosphere.

(3) Prior to each lifting operation, it is essential to make sure that:

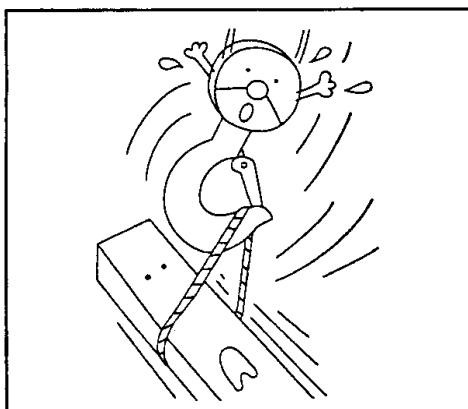

- (a) the correct lifting sling is being used.
- (b) the lifting sling is located in the hook as shown below (Illust. 2) and that a safety latch has been fitted.

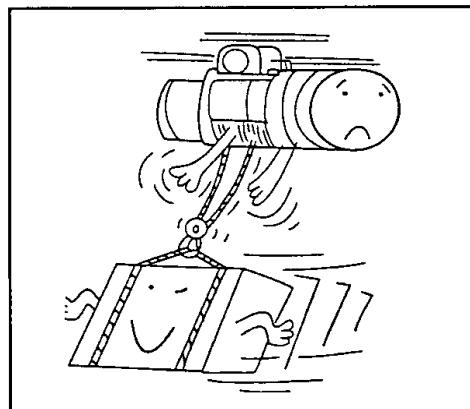

Illust. 2

- (c) the object to be hoisted is well secured for direct lifting (a proper lifting frame or apparatus is strongly recommended for direct lifting .)

- (4) Firm and steady button operation is required, never push the button switch intermittently.
- (5) Always avoid excessive inching operation.
- (6) Always make sure the hoist motor completely stops before reversing.
- (7) Always leave the push button switch cable and bottom hook vertically static after completion of operation, never leave them at any position which may cause swing or slip.
- (8) Sling must be applied to load evenly and centrally to ensure correct balance.
Never lift any object which is insecure or out of balance.
- (9) Never use hoist to end or side pull a load. (Illust. 3)
- (10) Never wrap around and hook back the wire rope as a sling to lift a load. (Illust. 4)

Illust. 3

Illust. 4

(11)

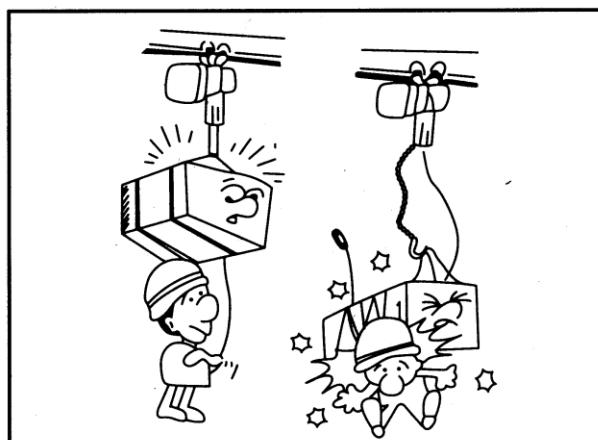

! WARNING

Do not use the hoist's wire rope as a welding electrode.

(12)

! DANGER

Never stand under a raised load (Illust. 5)

Illust. 5

- (13) Lifting must always be personally attended, never leave a raised load unattended.
- (14) Over-capacity-load lifting is hazardous and should not be undertaken.
- (15) Never lift a load when the wire rope is twisted.
- (16) Regularly inspect and check the condition of wire rope. Do not operate with damaged wire rope.

4. INSTALLATION

4.1 Unpacking Information

After removing the hoist from its packing box, carefully inspect the external condition of the electrical cables, contactor, gear box and motor casing for damage.

4.2 Voltage

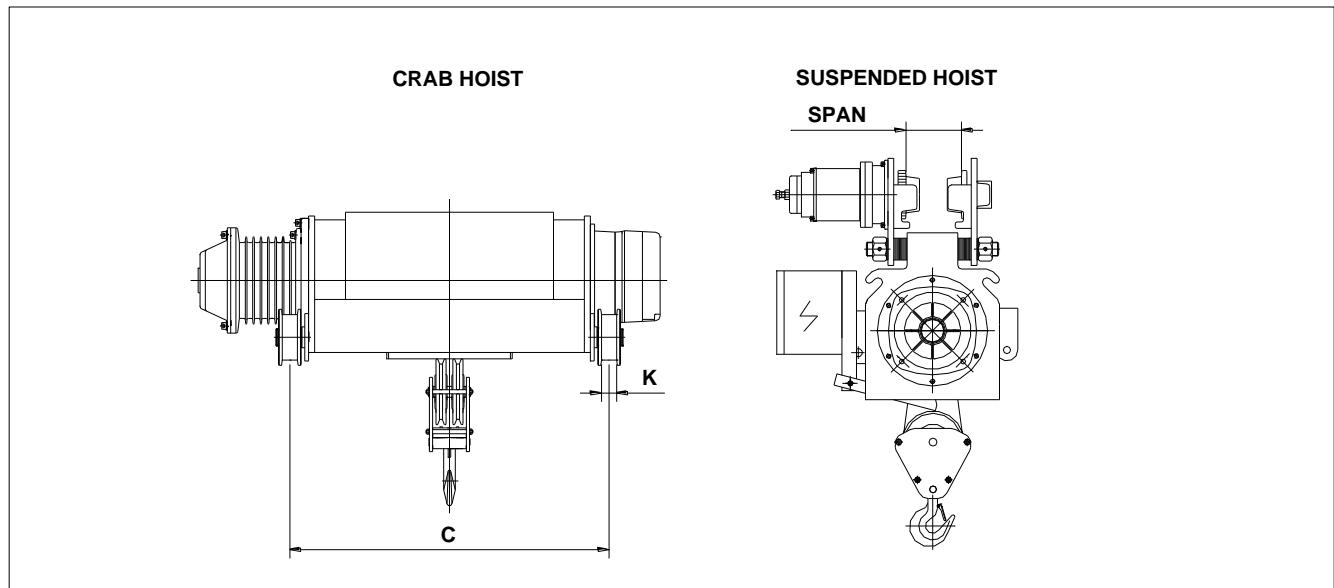

If power supply deviates from standard by more than $\pm 10\%$, abnormal operation or damage to the motor may result. It is imperative to ensure correct voltage supply before commencing operation.

4.3 Installation

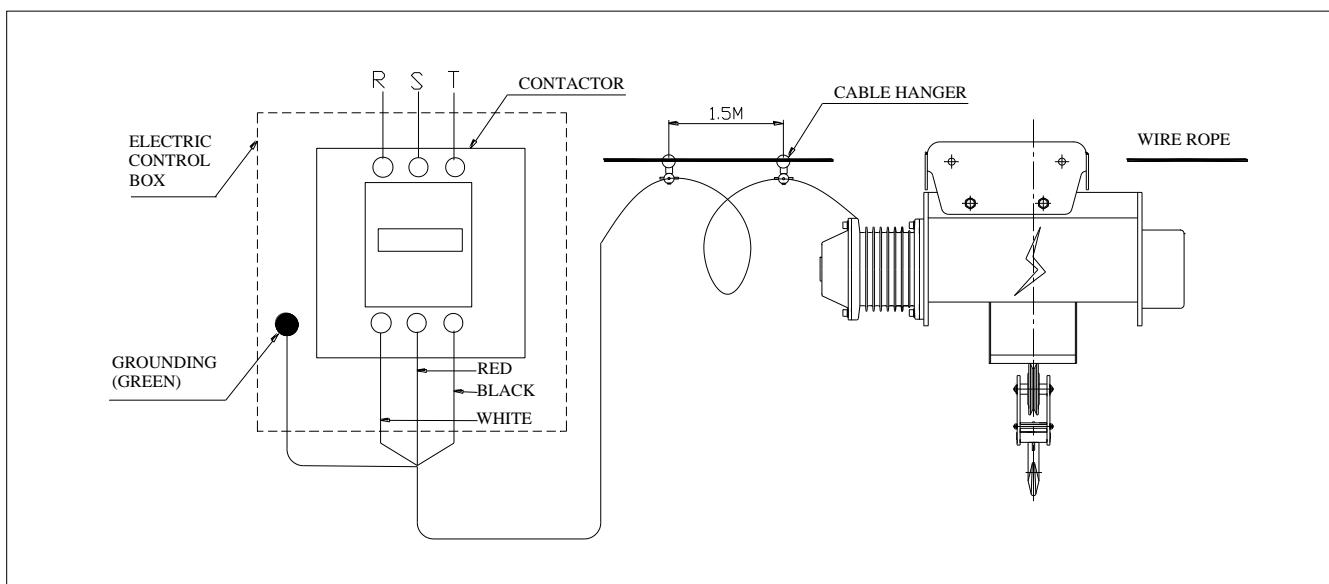

Connection to power supply before installation procedures having been completed is strictly prohibited.

(1) Prior to installation, the crab hoist should check dimension "C" & "K" adapt to the rails span over the girder and rail specification, if hoist is suspended from an electric trolley, please check trolley's span is adapt to beam's width. (please refer to Illust.6)

Illust.6

(2) Connect power supply to hoist and operate the push button switch. This operation must be carried out by a trained person, if hoist won't run after power connection, might due to phase error relay in function, just change any two of power cable connection in switch box then will run normally.

Illust.7

(3) Operation Test

- (a) Firmly push  switch button to lower bottom hook until the wire rope still have at least 3 round over the drum.
- (b) Firmly push  switch button to check the winding of wire rope to drum evenly spread over the groove.
- (c) Check the emergency stop device function (if fitted):
While holding down either  or  button on the push button switch, push the emergency stop button.
- (d) Check that the hook stops when the emergency stop button is pushed. Also, check the hoist does not move in response to the push button switch. Finally, check that the emergency stop device pops out when turned to the right and that operation can be resumed thereafter. If the equipment fails the above function, check the wiring and automatic locking function of the emergency stop device.

5. OPERATION

After running test and checks have been completed, the hoist will be ready for normal operation.

WARNING

Since dealing with heavy loads may involve unexpected danger, all of the "SAFETY RULES" (Ref 3.) must be followed and the operator must be aware of the following points while using the hoist.

- (1) The operator must have a clear and unobstructed view of the entire working area before operating the hoist.
- (2) The operator must check that the entire working area is safe and secure before operating the hoist.
- (3) When using the hoist with a motorized trolley, the operator must take care to prevent excessive load swinging by sympathetic use of the trolley controls.

6. MAINTENANCE AND INSPECTION

 **DANGER**

Do not perform maintenance on the hoist while it is carrying a load except monthly checking for the brake or limit switch.

 **DANGER**

Before performing maintenance do not forget to affix tags to the power source and the push button switch reading : "DANGER", "EQUIPMENT BEING REPAIRED".

6.1 Maintenance

(1) Check the level of gear box lubricant after the first 500 hours operation, thereafter check every 3 months and lubricate accordingly.

Note: We recommend using lubricant oil equivalent to ISO VG460 as table of following annual inspection.

(2) Always keep the hoist unit dry and never misuse it in a manner likely to reduce its durability.

(3) When it is necessary to keep the unit outdoors, a protective covering should be fitted.

6.2 Inspection

(1) Daily inspection: Before starting daily operation, check the following :

- (a) Correct power supply.
- (b) "Up" , "Down" and "Emergency stop" (where fitted) test runs under no load.
- (c) Correct motor performance.
- (d) No abnormal or excessive noise.
- (e) No malfunction of the bottom hook safety latch.
- (f) Proper function of moving/turning parts, limit switches and brake.
- (g) The condition of wire rope and winding evenly over the drum.
- (h) Wire rope out of the bottom hook's wheel groove or not.

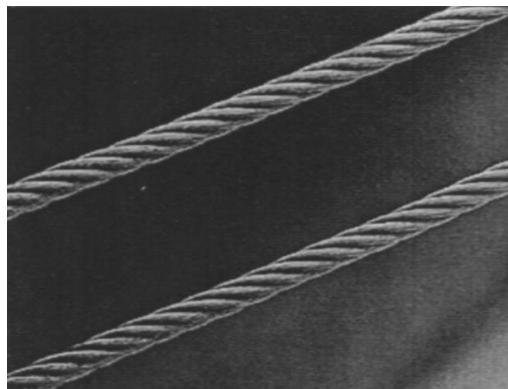

(2) Monthly inspection

WARNING

Always use the hoist manufacture's recommended parts when repairing a hoist.

(a) Wire rope:

- a-1: Any single strain of wire rope breaking. Breaking of strains more than 10% should replace new wire rope.
- a-2: Any distort, deform, itching and rust of wire rope.
- a-3: Wire rope fixing fasteners be deforming or loosing.

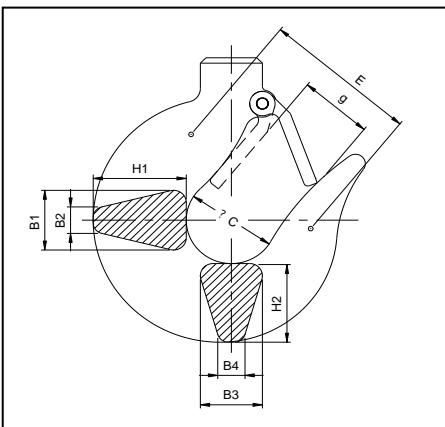

Rope Dia (mm) d	Model Being Used	Construction	Specified Breaking Load (kN)
Ø14	TBH(D)-750	Steel Wire Rope 6x37-H	123
	SBH(D)-750		
Ø16	TBL(D)-1000 SBL(D)-1000 SCAH(D)-1000		161
Ø18	SDAH(D)-1500 SFAH(D)-1500 SFAJ(D)-3000	Steel Wire Rope IWRC 6 × Fi(29)-H	234
Ø20	SEAL(D)-1500	Steel Wire Rope IWRC 6 × Fi(29)-H	289
	SCAL(D)-2000	Steel Wire Rope IWRC 6 × P.Fi(29)-H	331

Table 6-2-a

(b) Load hook:

Check hook with care. If hook shows crack, deformation or wear in excess of 10% of its original size, it should be replaced. (Ref. following table)

Capacity (ton)	Dimensions (mm)									Allowable Stress(kg/mm²)
	H1	B1	B2	H2	B3	B4	C	g	E	
7.5	85	61	22	77	61	22	85	62	140	70
10	100	68	27	95	63	27	100	70	152	70
15	120	85	32	110	83	32	120	82	165	70
20	140	100	38	130	95	38	140	105	220	70
30	140	98	38	130	94	38	140	105	220	100

Table 6-2-b

(c) Limit Switches:

A qualified electrician should perform this inspection.

Check correct operation of the limit switches, to prevent the drum from over winding.

(3) Annual inspection

Your dealer should be asked to perform this inspection.

(a) Check gearing for any excessive wear or damage.

(b) Replace gearbox lubricant completely.

Oil volume of gearbox

Gearbox	B	CA	DA	EA	FA
Oil Volume(L)	4.0~4.5	6.5~7.0	6.5~7.0	6.5~7.0	7.5~8.5

Table 6-3-b

(c) Check brake lining and ratchet pawl for emergency braking any wear or damage.

(d) Check operation of pawl spring.

(e) Check AC electromagnetic generator in good condition.

(f) After reassembly of above check, lifting a load several times to ensure good performance of the hoist before starting duty operation.

7. TROUBLESHOOTING

7.1 Wiring Diagrams

(1) B730005: Single Speed Wiring Diagram	16
(2) B730012: Single Speed With Emergency Stop Wiring Diagram	17
(3) B830011: Dual Speed Wiring Diagram	18
(4) B830012: Dual Speed With Emergency Stop Wiring Diagram	19

Our electric specifications can be done according to followings:

- (a) 3-Phase
- (b) 50Hz or 60 Hz
- (c) Single voltage

Hertz	Voltage	Single Voltage
50 Hz		220 to 600
60 Hz

Warranty Details

1. Warranty Period : One year for Mechanical Spare Parts after purchase the product.
2. Non-Warranty Scope:
 - a. Electrical Spare Parts (ex. Contactor, Pendant, Phase Error Relay, etc.)
 - b. Expense Spare Parts (ex. Chain Bucket, Brake Lining, etc.)
 - c. Damage caused by unsuitable operation.
(ex. Galvanize plant, Chemical Plant, Dye-work, etc.)
 - d. Damage caused by operating on the wrong electric voltage.
 - e. Damage caused by user amend the product.
 - f. Damage caused by natural disaster.
3. Warranty Scope shall be permitted by Cheng Day Machinery and Within One Year of damaged Mechanical Spare Parts Repair and Replacement.
(circumstance stated in detail No. 2 are not included.)

7.2 Troubleshooting and Remedial Action

SITUATION	CAUSE	REMEDY
Hoist will not operate.	(1) Blown power fuse or tripped power circuit breaker (2) Blown control circuit fuse (3) Broken/disconnected power or control circuit wire (4) Low supply voltage (5) Motor hums but does not rotate (6) Emergency stop button release pushed (if fitted) (7) Faulty contactor	Check supply requirements and replace the fuse/reset breaker to meet requirements Check fuse for correct rating and replace Locate and repair/reconnect Check if 10% reduction of voltage, have mains supply checked Check phases of motor - insulate and repair Check the cause as necessary Operate manually if hoist runs then control circuit/coil is faulty - locate fault and repair. If hoist does not run then check main supply. If input supply is correct but there is a faulty output supply then replace the contactor
Hoist will not stop	Welded contacts in contactor	Replace contactor
Brake slips	Abrasion of motor brake	Replace
Abnormal sound on the hoist operation.	(1) Wire rope dry (2) Twisting & bending of wire rope due to frequently side pull. (3) Worn or deteriorated oil packing	Lubricate Replace new wire rope. Replace new wire rope.
Electric shock	(1) Poor earth connection (2) Accumulated foreign matter/ moisture on electrical parts	Provide correct earth connection Remove foreign matter/dry electrical parts
Oil leak	(1) No oil plug (2) Oil plug loosen (3) No plug packing (4) Worn or deteriorated oil packing	Attach the normal oil plug Fasten the plug tightly Attach normal packing Attach the new packing

8. MODEL CODE EXPLANATION

Example:

● MODEL

T: MONORAIL TROLLEY

S: SADDLE TROLLEY

● GEAR BOX NO.

B: 11KW × 4P FA: 18.5KW × 4P

CA: 13KW × 4P

EA: 13KW × 4P

● REEVING/FALLING NUMBERS

H: 2/4

L: 1/4

J: 2/8

● SPEED

BLANK: SINGLE SPEED ONLY

D: ONLY HOIST DUAL SPEED

● CAPACITY

750 : 7.5T 1000 : 10T

1500 : 15T 2000 : 20T

3000 : 30T

For special applications please contact the factory or your local "Black Bear" distributor.

10. Adjust the air gap

#Routine Maintenance For Adjustable Brake:

1. Inspect every 3 months (for more frequently use, recommend to inspect monthly.)
2. Firstly, follow the arrow direction (the inspection hole) to install the 2mm thickness gauge to inspect the condition of wear out on the friction disc.
3. If the gap is smaller than 2mm, it's in the normal condition and can be use continuously.
4. If greater than 2mm, must take out (10) and adjust the brake shim FIG-1.

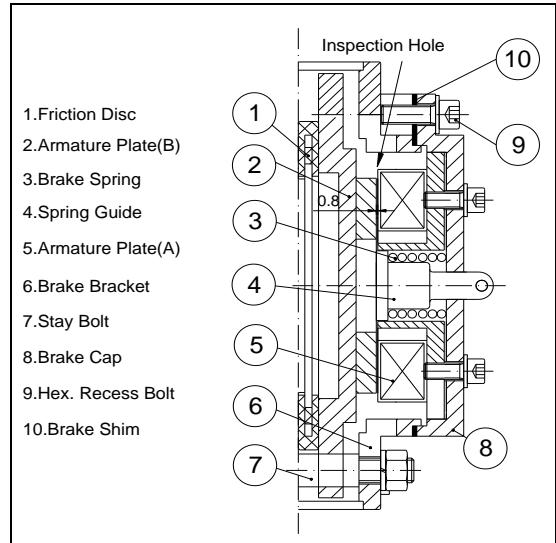

FIG-1.

#How To Adjust The Brake Shim:

1. Loosen 4pcs of hex. recess bolt (9) for 2 circles, take out 1pc of brake shim from each side left and right. And tighten 4pcs of hex. recess bolt (9) afterward.
2. Repeat the procedure until the gap is smaller than 2mm, then it can be applied continuously.
3. Manual release bar is located inside of control box. Purpose : for gap or release the brake.

#Operation for manual release bar:

1. Ensure main power is off.
2. Remove hoisting motor end cover.
3. Fix the release bar with the hex. recess bolt as FIG-2.
4. Pull the release bar as FIG-3.

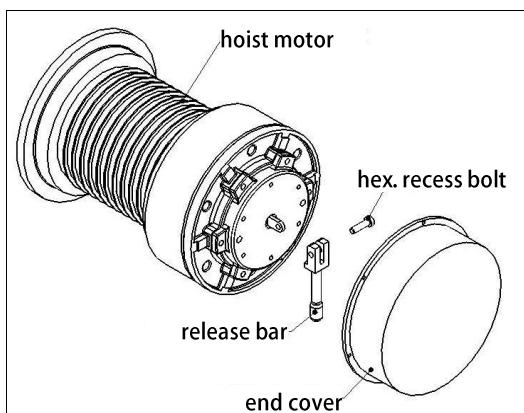

FIG-2

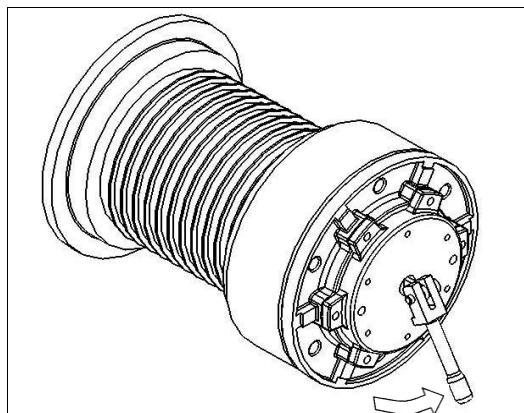

FIG-3.
